## **Public Speaking in English: ' Present your Professional Project in English '**

**Objective:** You want to work in an international environment and you need to be able to speak in Public: Passionately, Effectively, Powerfully ... and with Simplicity. You are comfortable in English but need to work on becoming more at ease when taking the floor in English whether it be in meetings, in interviews or explaining your objectives.

This workshop is not an English course, but rather an opportunity to put into practice public speaking skills around your professional project.

Each participant will come to this interactive hands-on workshop, prepared to introduce him/herself and present his/her professional project in English.

### **Program**

- You and Your Presence: Introduce yourself
- Best Practices in Public Speaking
- You and Your Message Your Professional Project
- You and Your Delivery: Job Interview - Using the 'coup de fil' exercise from the AVARAP method.

Feedback is provided by examining the most important qualities of a powerful and energetic public speaker and by focusing on the aspects that each participant needs to develop. We will examine ways to overcome nervousness and thereby improve self-awareness, self-confidence and presence.

The workshop is led by an 'American in Paris', specialist in communication and public speaking.

**Number of Participants:** 8 to 10 participants

### **Time**

One day workshop from 9H30 to 17h00

**Contribution to course costs :** to be paid at arrival

### **Sign up:**
